

Automatic upload of FIT files from Garmin Connect

AUTOMATIC UPLOAD OF FIT FILES FROM GARMIN CONNECT

To do this, you will need to **create a Garmin Connect account** at the URL

<https://cyclistanalytics.com/>

At the bottom, fill in the fields and click on the Garmin Connect logo

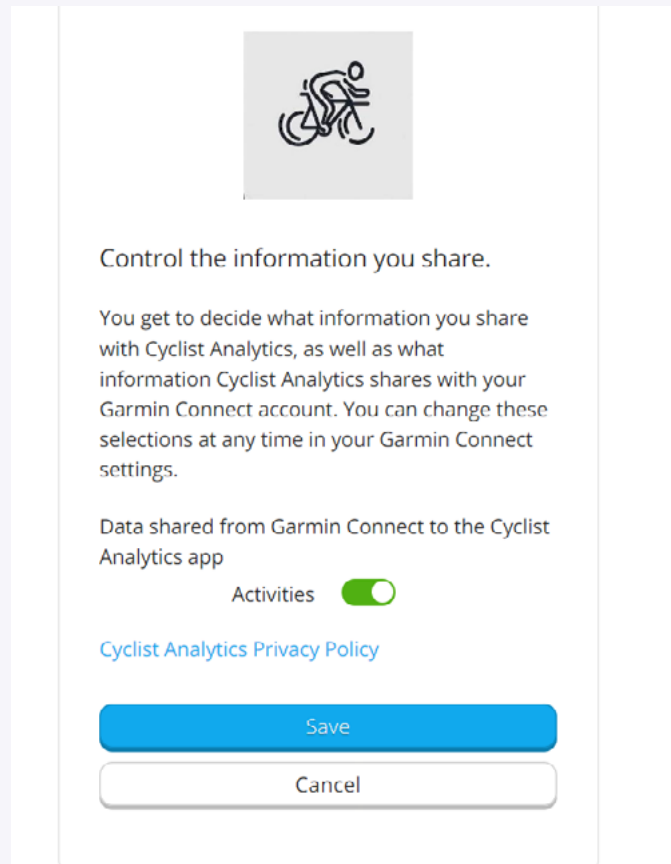

A registration form on a black background. It features two input fields: "Email Address:" and "Full name:". Below the fields is the Garmin Connect logo, which consists of a blue square with the word "GARMIN" in white and a white "C" inside a blue circle.

Automatically, you will be redirected to **log in to Garmin**.

The Garmin Connect login page. The background shows a scenic view of a forested hillside with a wooden fence. A man in a red shirt is running on a path. The login form is white and contains the following elements: the "connect" logo in the top left; the title "Iniciar Sesión"; a text input field for "Dirección de correo electrónico *"; a text input field for "Contraseña *" with a "Mostrar" link; a "Recordarme" checkbox and a link "¿Has olvidado la contraseña?"; a blue "Iniciar Sesión" button; and a link "¿No dispones de una cuenta? [Crear una](#)".

Once you enter your credentials, the screen will appear to authorize the data upload.

NOTE

Sometimes an error message may appear. In that case, click the browser's Back button, and it will automatically reload the data and display the authorization screen.

Once the process is completed, you will see the message confirming that authorization has been successfully completed.

Your Garmin account is now successfully connected with "Cyclist Analytics."

As a result, your Garmin activities will be processed and made available to the performance team for analysis.
